- **Instruments:** HPLC, UHPLC, and GC systems with high precision, automation options, and advanced detection capabilities
- **Columns:** Broad range for HPLC and GC, including C18, ion exchange, chiral, and specialty columns in various dimensions.
- **Reagents:** HPLC- and GC-grade solvents, buffers, and additives for reliable, high-purity analysis.
- **Standards:** Certified reference materials for pharma, environmental, and food testing; available with COAs and custom mixes.

We also offer a wide range of high-quality plasticware and glassware essential for everyday laboratory operations. Our selection includes volumetric flasks, beakers, pipettes, vials, and storage bottles—available in various sizes and materials to suit different applications. All items are manufactured to meet laboratory-grade standards, ensuring chemical resistance, durability, and precision. Whether for routine analysis or specialized procedures, our glass and plastic labware provide reliable support for accurate results.
